

ASEPTISIL VEIN TUBE

HOSES › Pipes for the pharmaceutical industry › SILICONE hoses for the pharmaceutical industry

Antimicrobial silicone hose composed of 100% material that guarantees the integrity and protection of the entire structure of the product.

Particularly suitable for food contact applications in the transport of liquid or semi-liquid fluids in the food and beverage industry. It offers an extremely wide field of application, particularly effective in cases where the use of water or other fluids occurs intermittently in hot conditions, without the possibility of drying between uses.

Property

- White and smooth outer layer.
- Reinforcement: No.
- White and completely non-toxic inner layer.
- Operating temperature: -60°C (-76°F) to +200°C (+392°F), can reach 220°C (+428°F) for short periods.
- Production length: standard 25 meters long (82.02 feet), other lengths on request.

Regulations

US FDA regulation 21 CFR 177.2600.

ResAp 2004 (5) according to Reg 1935/2004/EEC and Reg 10/2011/EEC.

Tested in accordance with ISO 22196:2011 on E.coli and MRSA
Active ingredient compliant with the Biocidal Products Regulation (EU) 528/2012.

The silicone rubber used complies with the EU Directive 2002/95/EEC for the restriction of the use of hazardous substances (RoHS).

Available standard internal diameters (mm) Ø

1.59 - 2.38 - 3.18 - 4.76 - 6.35 - 7.94 - 9.52 - 11.11 - 12.70 - 15.88 - 19.05
