

CUSTOMIZED SILICONE HOSES

HOSES › Pipes for the pharmaceutical industry › SILICONE hoses for the pharmaceutical industry

Flexible silicone adapters suitable for the transport of fluids in the food, pharmaceutical and biotechnology industries.

Customized flexible adapters made of FDA and USP VI platinum cured silicone, specially designed for the food and pharmaceutical industry.

recommended for:

- Compensate for system vibrations, optimize the overall life of hose or pipe connections.
- Solve misalignments of the movement system and increase the ease of installation of the pipes.
- Offer sound dampening characteristics in process systems due to the elastic and flexible structure.

Outer layer: VMQ silicone, smooth and translucent.

Reinforcement: Custom.

Inner layer: Customized.

Temperature: Depending on the material

Production Length: Customized.

All types of shapes, including reducers, elbows and any custom design.
