

## GALVANIZED POLYGONAL METALFLEX PIPE

HOSES › Flexible metal pipes

**Self-supporting flexible metal pipe (if constrained) with double interlocking, polygonal section and gasket.**

### APPLICATIONS

- Hose for high productivity of abrasive powder, bulk material, granules and gases
- potentially explosive area
- Extraction system, dust collection system, filtration system, oil mist extraction
- Wood dust extraction, wood chips: wood industry, furniture production, sawmill
- Paper mill, paper industry, packaging machine: edge suction
- High temperature mining: furnace, foundry, blast furnace, smelting, ceramic industry, glass industry, steel mill, aluminum smelter

### PROPERTY

- abrasion resistant
- excellent heat resistance
- Hardly flammable
- Electrically conductive wall: volume resistance and surface resistance <10<sup>3</sup> (acc. NFPA 652 <106 O)
- according to ATEX 2014/34/EU (1999/92/EC) and German TRGS 727: pneumatic conveying of flammable dust and bulk materials (Zone 20, 21, 22 indoors)
- RoHS compliant

### CONSTRUCTION:

- Metal tube with single profiled metal band, galvanized steel.
- Profile hooked with fiberglass gasket.

STANDARD PACKAGING: 10m roll

TEMPERATURE RANGE: up to 400°C

### DELIVERY VARIANTS:

- Other sizes available on request
- without gasket
- with rubber gasket
- with quick connection system
- Welding joints
- Flanged connection system
- Reduction funnels
