

RILSAN HT PIPE High Temperature

HOSES › Specific flexible hoses for engine test rooms

Semi-rigid linear flexible RILSAN[®] HT pipe suitable for use in the presence of high temperatures.

Tube in thermoplastic Polyphthalamide (PPA) bio-polymer, obtained from renewable sources, semi-flexible and stabilized against light and heat. Suitable for high temperatures, resistant to aging and hydrolysis.

Fields of application: Industrial automation, Vacuum, Machine tools, Automotive, Steam, Chemical vapours.

OPERATING TEMPERATURE: -30°+130°C (peaks of 150°C for a few minutes)

safety factor 3:

Black colour.

Standard lengths 25-50-100m
