

PL OIL TUBE

HOSES › Flexible pipes for ventilation or cold air intakes

Flexible hose for suction of oil vapors mixed with air at a maximum continuous temperature of 80°C, peaks of 100°C for a few minutes. Consisting of an armor with a harmonic steel wire spiral incorporated between a heat-sealed sheet of elastic and soft PVC 0.45 mm thick. Exceptional flexibility and axial compressibility. Good resistance to oily vapours. Dark blue color.

Use: ventilation, air intake, fumes, vapours,

Operating temperature: -20° +80° C peaks of 100° for a few minutes

Standard lengths 10 metres, on request 20 meters up to Ø 400, plus 5m lengths.

Bend radius: R:0.70x Ø

Axial compressibility: 6:1
