

HEAT PIPE/10/SPL MULTIPURPOSE

HOSES › Chemical hoses

HEAT HOSE/10/SPL MULTIPURPOSE in EPDM rubber

Structure: heat-resistant EPDM synthetic rubber, synthetic textile reinforcements, synthetic covering resistant to aging and atmospheric agents in EPDM. Appearance: smooth black exterior with canvas impression, smooth black interior.

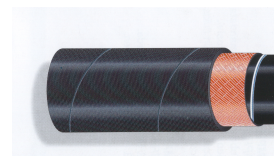

Built-in steel spiral.

Use: Hose suitable for passing hot water, even mixed with steam and antifreeze liquids, in car radiators, engine cooling systems, heating circuits of car chemical products, sea water.

Working temperature: -40°C +120°C.

Maximum continuous working pressure: 10bar, safety coefficient 3.

40/60 meter rolls.
